

ISDEFE IN THE  
DEFENCE AND  
SECURITY SECTOR

**Isdefe**  
your best ally

## ISDEFE

Ingeniería de Sistemas para la Defensa de España, Isdefe, is a state-owned public company created in 1985 and owned by the Ministry of Defence. It is the in-house technical defence and security services provider to the Spanish Public Administration.

## MISSION

To support the Ministry of Defence, Public Administrations and international institutions in areas of technological and strategic interest by providing top-quality consulting and engineering services, as well as by managing, operating and maintaining space complexes.

## PRESENTATION OF THE DEFENCE AND SECURITY SECTOR

Isdefe was created for the purpose of satisfying the demand to define the technological needs of the programmes put forth by the Ministry of Defence. Over our history we have developed new areas of knowledge and specialised services. We have also expanded our activity to include the Interior Ministry and international organisations like NATO (North Atlantic Treaty Organization), the EDA (European Defence Agency) and Frontex (European Border and Coast Guard Agency).

## AREAS OF ACTIVITY

-  Defence planning
-  Command and Control Networks and Systems
-  Platform Acquisition and Maintenance Programs
-  Technology Centres
-  Logistics and Supply Chain Systems
-  Intelligence and Electronic Warfare Systems
-  Security for Information Systems and Critical Infrastructure
-  Strategic Infrastructure
-  Border Surveillance and Control Systems
-  Technology and Industrial Management
-  Crisis and Emergency Management Systems

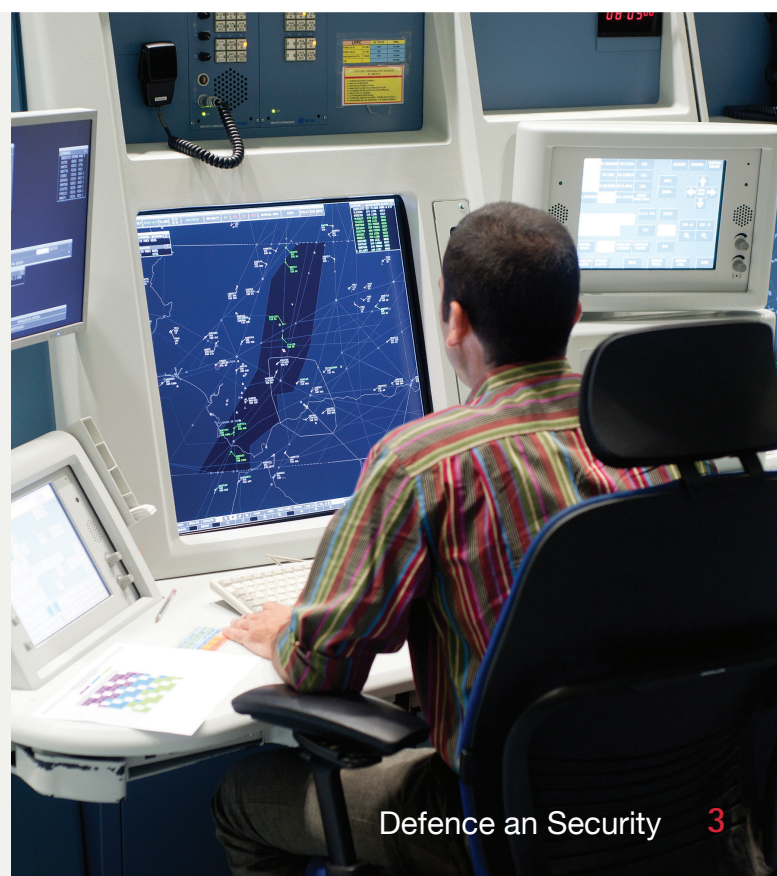

**Isdefe, the Spanish Administration's in-house defence and security services provider, has been supporting the Ministry of Defence, Armed Forces and Ministry of the Interior for more than 30 years**

### Defence Planning

We support the strategic military planning process, intended to identify the material means and resources needed to equip the Armed Forces with the capabilities they need to carry out their duties in the areas of both national and European defence.

### Command and Control Networks and Systems

We provide life cycle solutions for Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) systems at the strategic, operational and strategic levels for the military, law enforcement agencies and international public organisations.

## **Platform Acquisition and Maintenance Programmes**

We offer technical-financial and management consulting throughout the acquisition and modernisation life cycle of aerial, land and naval platforms, including those that are remotely piloted, ensuring comprehensive solutions that include planning, financial, technical and maintenance aspects.

## **Technology Centres**

We make available to defence research, development and experimentation centres our multidisciplinary teams, which have the scientific, technical and management know-how and experience needed to carry out activities in the aeronautical and space sectors, and in technologies involving Nuclear, Radiological, Biological and Chemical defence (NRBQ).

## **Logistics and Supply Chain Systems**

We provide technical support services to improve the efficiency and control of the logistics systems of the Armed Forces, offering solutions for the supply chain and the management of logistics centres. Isdefe also possesses an in-depth knowledge of the processes of the NATO Cataloguing System.

## **Intelligence and Electronic Warfare Systems**

We work with military and police organisations to engineer intelligence interception and electronic warfare systems, as well as to design and test systems to inhibit and jam unauthorised communications in an effort to support the strategic, operational and tactical commands in their missions.

**Isdefe's revenue from the Defence and Security sector in 2017 accounted for 56.12% of the organisation's total**

## **Security for Information Systems and Critical Infrastructure**

We help ensure the security of critical systems, providing comprehensive coverage (information, persons, facilities) for every activity involving security, placing special emphasis on the information systems vital to national defence and security and to the normal operation of Public Administrations and critical infrastructures.

**Isdefe is a leader in cybersecurity and in safeguarding information for the Spanish Administration**

## **Strategic Infrastructure**

Support services in managing strategic facilities in managing strategic facilities, such as naval bases, police centres and airports, which are essential to the normal operation of a country. We do so by providing planning, design and management services for these types of specialised facilities, and offering these engineering services to both military and civil authorities.

**We have multidisciplinary team in the scientific-technical area and managing Ministry of Defence Technology Centres**

## **Border Surveillance and Control Systems**

We work for border control agencies, offering analysis services and contract support, and developing systems to monitor and control borders (smart borders) and to identify and neutralise potential threats in land and maritime border areas.

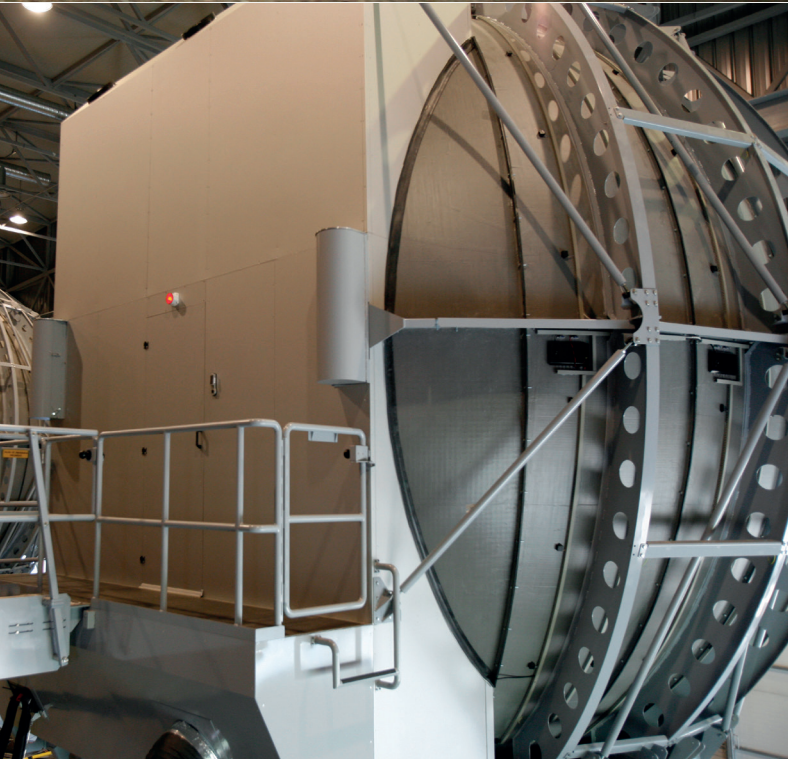

**We offer highly technical and comprehensive border management consulting services to the Ministry of the Interior**

## Technology and industrial management

We collaborate to promote the development of the national industrial capacity by helping to define technology/industrial plans and policies, managing industrial cooperation, analysing industrial capabilities, implementing technology surveillance and competitive intelligence systems and promoting platforms for innovation.

## Crisis and Emergency Management Systems

We provide technical support to national and international agencies to help them manage special situations. We do so by advising military and civil protection organisations on the development of crisis control and management centres, with special emphasis on command, control and communications systems as well as on organisational and management aspects.

**Isdefe offers consulting services to military and civil protection organisations to help them develop crisis control and management services**
