PRESENTATION OF THE INFORMATION AND COMMUNICATION TECHNOLOGY SECTOR (ICT)

ISDEFE

Ingeniería de Sistemas para la Defensa de España, Isdefe, is a state-owned public company created in 1985 and owned by the Ministry of Defence. It is the in-house technical defence and security services provider to the Spanish Administration.

MISSION

To support the Ministry of Defence, Public Administrations and international institutions in areas of technological and strategic interest by providing top-quality consulting and engineering services, as well as by managing, operating and maintaining space complexes. Isdefe has a long history in the area of Information and Communications Technology (ICT), providing engineering and consulting services to define public digital and e-admin services, plan and manage the radio spectrum, manage the digital dividend and bridge the digital divide. Along these lines, our teams support the Ministry of Economy and Business Secretary of State for Digital Advance (SEAD) and other agencies that regulate and oversee ICT services. and other agencies that regulate and oversee ICT services.

Radio Spectrum

Command and Control Networks

Radio Spectrum

and Systems

We aid in planning and managing the radio spectrum for the different radio communications services throughout Spain, ensuring the universal quality and availability of the service to society. Along these lines, we have worked on projects to define and track the National Plans to Transition to Digital Terrestrial Television (DTT) and to Manage the Digital Dividend.

ENTITIES AND ORGANISATIONS TO WHICH WE PROVIDE OUR SERVICES

THE SPANISH ADMINISTRATION

OTHER PUBLIC ORGANISATIONS

INTERNATIONAL PUBLIC ORGANISATIONS

Command and Control Networks and Systems

We provide specialised technical support on Information Security and Digital Trust, offering support in the management and execution of communications programmes, like the New Infrastructure Plan to promote the deployment of ultra-fast networks and broadband infrastructure. We also provide consulting regulatory and analysis services on the telecommunications markets.

More than 30 years of engineering and consultancy services in the planification, management of the radio spectrum and digital dividend
